QASource Tops List in TEST Magazine's
"*20 Leading Software Testing Providers 2017*"

PLEASANTON, California, September 20, 2017 - QASource, one of the world's leading software QA services providers, has received the distinction of being listed in the top three of QA companies in 2017's 20 Leading Software Testing Providers by *TEST Magazine*, which published its digital September issue today.

"We are gratified to be on this very exclusive and meaningful list," said Rick Rampton, Head of Client Success at QASource. "TEST Magazine is one of the premier publications in the software testing industry. We are glad to be recognized again this year, especially as we've made some significant business acquisitions and been recognized in key analyst reports."

QASource in August made news for its acquisition of MyCrowd QA, a crowdtesting company. The acquisition expands the suite of services QASource offers to include crowdsourced testing. QASource also delivers a short-term, pay-as-you-go offering through QAOnDemand, in addition to its core service of providing dedicated, offshore QA engineers to customers' software

This summer, QASource was also listed as one of the 25 major global players in the API test market in an analyst report published by MarketsandMarkets™, and as one of the top global pure-play mobile application testing providers by Gartner.

QASource boasts a hybrid onsite/offshore model that combines offshore technical talent in India with U.S. management, and QA leads embedded in clients' engineering departments - enabling them to avoid the risks that often accompany a remote testing team.

QASource has been listed in TEST Magazine's 20 Leading Software Testing Providers in previous years. The prestigious list is often used as a buying guide for those in the market for testing partners.

The magazine's online and print editions will be released next week.

"The software testing landscape changes rapidly and we find that an annual update on the marketplace is a good starting place as you consider purchase decisions going forward," according to TEST Magazine.

About QASource

Headquartered in Pleasanton, California, with an office in Chandigarh, India, QASource is one of the world's leading software QA providers. Since its foundation in 2002, QASource has grown to become an international organization with thousands of professionals servicing a variety of clients ranging from VC-funded startups to Fortune 500 companies. QASource has demonstrated a growth rate of 20% to 50% annually, and is a market leader in test automation services. QASource customers have had successful exits exceeding $15 billion in M&A transactions, leading to the company's tagline, "Quality That Creates Value."
